

Appl. No. 10/085,913
Response dated May 25, 2005
Reply to Office Action of March 7, 2005

sulfonate, an amine alkylbenzene sulfonate, or an alkali metal soap of a modified resin and wherein the latex contains no solvent and wherein the chain extending reagent includes water.

14. (canceled)

15. (previously presented) A composition comprising a stable polyurethane latex having a mean volume average particle size of not greater than about 1 micron and a solids content of at least 45 percent by weight, wherein the polyurethane latex consists of a non-self emulsifying prepolymer and contains units formed from a chain-extending reagent selected from the group consisting of water, diamines, and alcohol monoamines and wherein the latex is stabilized by an external anionic surfactant.

16. (previously presented) The composition of Claim 15, wherein the latex is stabilized solely by an external anionic surfactant.
